

DPAS Software Update

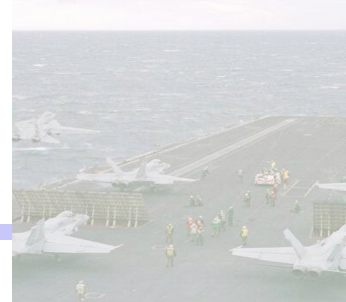

July 16, 2004

Release 16.5.00

- *Fielded June 28th, 2004.*
- *Consisted of 2 client components.*
 - *DPAS Application*
 - *Supra SQL Driver Package*
- *Overall - release is going well.*
- *Supra Driver Package allows users without admin rights to the desktop to be able to establish xParam information for themselves (No longer requires a person with Administrative Rights to configure the PC).*

DPAS Software Update

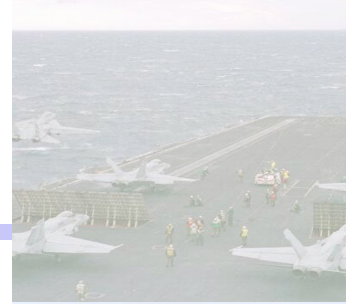

- *Several Issues that have been worked/ or in process.*
 - *FED LOG Update has been completed to all User Databases as of July 10th.*
 - *“Special Characters” found in Nomen/Generic Nomen fields of FED LOG Import, Fix is being worked.*
 - *Most Server Problems encountered to date have had a fix issued.*
 - *A couple of client problems have been discovered.*
 - *Eureka Metadata file - Corrected and available as download from Web Site*
 - *DD Fm 1348 - Incorrect Version Released*

Automated Identification Technology Hardware Update

- *Intermec has been awarded the AIT III Contract*
 - *Greatly reduced pricing for PDAs.*
 - *Current GSA Pricing – DPAS 750 Imager Kit - \$2700*
 - *AIT III Pricing - 750 Imager Kit - \$981*
 - *Expect reduced pricing for printers as well.*
- *Recommendation – If planning to procure AIT hardware, use AIT III. Could be available for ordering as early as next week.*

Other AIT Notes

- *Will be updating website when AIT III contract details are provided.*
- *Symbol reports they will no longer market directly to Government, via 3rd party vendors only. Considering eliminating the Symbol Line-up as a recommendation for purchase.*
- *No plans to discontinue DPAS Software Support to any PDCD currently supported.*
- *UID, 2D Matrix Bar Cd – Requires Imager*
- *As a result of 2D requiring Imager & AIT III pricing for the 750 w/Imager, may only list one PDA for purchase for use with DPAS*
